In Reply Refer To:

Dear Sirs,

As Technical Director of the Cardiac Catheterization Laboratory at the Denver Department of Veterans Affairs Medical Center I had the opportunity to work with Mrs. Victoria Hall from 2/88 to 11/92. Most of my contact with Mrs. Hall has been in the last three years after Mrs. Hall was selected to start-up QUEXTA. Mrs. Hall was the major factor behind the smooth and rapid implementation of this complex research protocol. Mrs. Hall had minimal supervision in implementing QUEXTA and would only request assistance in rare circumstances.

Mrs. Hall's efficient work habits allowed her to complete her QUEXTA duties and still have time to help throughout the cardiology department and assist in data collection and interpretation for several ongoing research efforts.

Also Mrs. Hall has pursued research on her own and has now published in a prestigious nursing journal. In addition, she is listed as a co-author on accepted manuscript.

In summary, Mrs. Hall is an excellent health care worker. This department will be hard pressed to replace her.

Sincerely,

A handwritten signature in cursive script, reading "Charles C. Barbieri", is written over a horizontal line.

Charles C. Barbieri, RN, CCRN, RCVT, CCT, CRTT
Technical Director, Cardiac Catheterization Laboratory
Denver Department of Veterans Affairs Medical Center
